

Student: \_\_\_\_\_

Paraprofessional: Abd. Isa

Date: 05/12/11

Explanation of activity:

Math addition regrouping  
2nd grade Math level student have to  
add number using his counting ability &  
his finger for smaller numbers and blocks  
for larger numbers.

Number of problems attempted (if applicable): nine

Number of problems completed correctly: all the problems

Reflection on activity (be sure to include if you felt the activity was successful or not and why):

Student was able to count and add  
the number correctly. he had no difficulty  
in adding smaller number i.e  $1+2$  or  $3+2$   
when using his fingers to count.  
he hesitated in adding larger numbers  
i.e  $5+9$  or  $7+8$ . he was able to do it  
with help but when he use blocks he  
had no problem at all.
